CROMWELL GREENSPRING MID CAP FUND

Mid-Caps – “Sweet Spot” of the Market

- ▶ Capitalize on market inefficiencies as mid-cap companies are less followed by Wall Street analysts than their larger counterparts.
- ▶ Focus on well-capitalized mid-sized businesses with strong, market-leading and defensible franchises underpinned by secular and/or company-specific tailwinds.
- ▶ A bottom-up, time-tested and disciplined approach to security analysis and valuation with an emphasis on a company's ability to generate free cash flow.
- ▶ Fundamental analysis designed to reduce portfolio downside volatility and generate superior risk-adjusted returns over full market cycles.

Mutual fund investing involves risk. Principal loss is possible. Mid-capitalization companies may be subject to greater price volatility, significantly lower trading volumes, and cyclical, static or moderate growth prospects than equity securities of larger companies. The investment strategies, practices and risk analysis used by the Sub-Adviser may not produce the desired results.

Active Share measures the percentage of stock holdings in a fund that differ from a benchmark. Free cash flow is the cash a company generates after taking into consideration cash outflows that support its operations and maintain its capital assets. The Russell Midcap Index is comprised of approximately 800 publicly traded U.S. companies with market caps of between approximately \$1.5 and \$51 billion as of the last annual index reconstruction. The Russell 3000 Value Index is composed of those companies among the largest 3000 US-incorporated equities by market capitalization that exhibit value characteristics such as lower price-to-book ratios and lower expected growth rates. This total return market index assumes that all cash distributions are reinvested, in addition to tracking the price movements. The ICE BAML 1-3 year BB Cash Pay High Yield Index, a subset of ICE BAML U.S. Cash Pay High Yield Index, consists of all securities rated BB- through BB+ by S&P with a remaining term to final maturity of 3 years or less. The ICE BAML U.S. 3-month T-Bill Index reflects the performance of purchasing a single T-Bill issue at the beginning of the month and holding it for a full month. An investment cannot be made directly into an index.
